

Publicly Display of Election Results

Proposed by the Deputy President for Postgraduate Affairs to the TUSSU Student Council

Student Council notes with concern

The transparency and accountability of the electoral process are essential for maintaining trust and confidence among the student body but currently, the election results of TUSSU elections are announced during a real time online session, but there is no public display of these results on the TUSSU website for further consultation of the student body.

Student Council mandates

TUSSU to publicly display election results on its website following the announcement of results for all TUSSU elections.

Student Council further mandates

TUSSU to examine the feasibility and implications of incorporating the requirement for public display of election results into the TUSSU Constitution, upon the next constitutional review.
